

Part Two
"Who will guard the guardians?"
- Juvenal, Satires

A- Rafer Johnson and the gun:

I arranged for a meeting with Rafer Johnson in the spring of 1973 because I wanted to ask him what he did with the pantry scene gun which he had possession of for almost two hours. Did he examine the gun? Did he record the gun's serial number? What is the gun's serial number and make? He told me he did write down the gun ID number in his diary and he gave me his unlisted telephone number - if I call him at home he will give me the number. Every time I telephoned his mother told me Rafer would return my call. He never did. In fact he refused to communicate with Sirhan's attorney re gun ID number. He promised me to give me the gun ID number - but, without any explanation whatsoever he reneged. Why? *Rafer - Give us the gun number,*

B- Criminalist William W. Harper and leaks from LAPD:

When Harper learned I made frequent trips up to San Quentin to visit Sirhan he shared that information with me to question Sirhan about. And, years later when the LAPD SUS files were made available to the public I carefully examined the evidence and records and all of Harper's information proved to be correct. That is all but one. Harper named one of the shooters in the Ambassador Hotel pantry but nowhere in that voluminous record was I able to find any record of that person being a shooter.

I must also include criminalist Lowell Bradford as being most helpful when I asked him to review my research findings. He was one of the seven examiners who examined Sirhan evidence in 1975 Judge Robert Wenke Court Order 2. Note, reference to Wolfer and NAA test testimony.

C- Hypnotism:

Mary Sirhan and I received a telephone call at the house in which the caller told us where it was that Sirhan was first introduced to hypnotism and by whom. We were never able to find the location, but years later I found a document which very well might be the place the caller called about. Maybe it means something and maybe not.

D- Jerry Owens

E- Thane Eugene Cesar gun wrong serial number sent to CII. (X should be Y)

Ted Charach's brilliant research was his discovery of both the Cesar gun sale receipt as well as the Cesar gun itself.

F- Sirhan look-a-like @ Corona firing range

G- Bullet particles

H- Sirhan promised prisoner exchange for guilty plea. When Mary Sirhan confided in me about this secret plea (guilty) in exchange for a future prisoner exchange I knew there was something that just didn't make sense. And, it didn't.

I- Sirhan repairs his car. His hope of buying a new Mustang is gone.

J- "Photographer" on the platform

/

- K- Khaibar Khan - Michael Wayne - Keith Duane Gilbert - Sirhan (links?)
George Ross Clayton/Michael Wayne (is it Ross or Gregory?)
It will be remembered that Item #24 and Item #25 were photographs and film cannister. However those same item numbers (24 & 25) were also the item numbers for the RFK fatal bullet and fragments.
Years later when Jamie Scott Enyart sued LAPD for the return of his pantry scene photos and film cannister he was given the Clayton items 24 & 25. Then during the trial the film cannister was "stolen" from the vehicle of the courier who was delivering it from California State Archives. Enyart won his lawsuit - and I do not buy that "stolen film cannister" story. Do these folks simply do what they want to thwart justice? Apparently so. If there is but one glaring deception in this entire case it is the "stolen" film cannister. It should be remembered that the film cannister contained Scott Enyart's pantry scene negatives which the Enyart judge ordered delivered to the court.
- L- For years this fraudulently created document puzzled me, then finally last week I indeed discovered positively irrefutable proof that this specific Jake Williams Property Report written by LAPD is a fake. Pure and simple, and I ask crime labs and examiners of questioned documents to please examine my stinging discovery.
In brief this is the story: LAPD criminalist DeWayne Wolfer testified in February 1969 that the gun he used (for sound and tattoo tests), the Jake Williams gun (H18602) is "still available". However, this was untrue because the gun was destroyed in July 1968 as several official documents report. Now, it is perfectly plausible that Wolfer simply erred and did not lie when he testified that the (other) gun was still available. He might have been unaware of the July '68 destruction. This is entirely possible in light of the fact that gun H18602 most certainly should have become evidence in Sirhan case since it was used for test purposes. Additionally, it was not the Sirhan gun which was used for comparison test bullets (with victim bullets), it was the Jake Williams gun H18602 - and this is seen on evidence envelope People's 55 during Sirhan trial but bearing the Williams gun number on the 6-6-68 water recovery test. See photos of evidence envelopes in my reports.
Here is my discovery: examine the positioning of the bottom binder holes and the binder holes at the left of each copy of the Jake Williams Property Report. The damaging report with the stamp "DESTROYED JULY 1968" supported the CII teletype date of destruction July 1968. Additionally there are other official cards which show destruction of H18602 in July 1968. Please superimpose all of the Jake Williams Reports for EXACT line-up of the handwriting.
The substituted Jake Williams Property Report is without a doubt a falsely created document.
- M- If these documents are to be believed then this is a clear violation of Judge Arthur Alarcon's Court Order which sealed the evidence in the custody of the Los Angeles County Grand Jury on June 7, 1968.
Here are the background facts re this court order violation:
The alleged Sirhan gun was turned over to the custody of LACGJ on 6-7-68, however there was no record of the gun's ID number recorded anywhere in the LACGJ transcript. The enclosed documents show that gun H53725 (the gun ID currently housed in the California State Archives) was transferred to SUS on August 24, 1968. This is a clear and flagrant violation of Judge Alarcon's court order. Remember, that Wolfer used the Jake Williams gun (H18602) because the Sirhan gun ~~was~~ required a court order to access it (see documents in L above).

- N- The Los Angeles Police Department Property Report referencing Item 71 differs in two separate copies of the same item number. This difference amounts to a deliberate obfuscation of information about the hidden torn gun label (from the gun box). For a full explanation of this affair I ask the reader to examine my book Robert F. Kennedy/Sirhan Evidence Report as well as my Special Exhibit 10 Report in the first part of this web site.
- O- Munir Sirhan purchased the gun from co-worker George Erhard for 25 dollars. Sirhan contributed seven dollars of the purchase money.
- P- Sirhan's "diary" Only legible pages used.
- Q- Additional documents and photographs. Includes Fair Play to Cuba Comm. document.

In conclusion - I feel there isn't a crime lab in the world which would defend this abysmal record of wrong-doing and outright fraud in many instances of the evidence in Sirhan/Kennedy case. Especially is it egregious that there is a woeful lack of a chain of custody for nearly all of the ballistics evidence. Even the Ninth Commandment admonishes us : "Thou shalt not bear false witness against thy neighbor."
